DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 28, 2006 has been entered.

Election/Restrictions

2. Newly submitted claim 58 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: This method and the originally presented method are mutually exclusive. Either the first rinse is performed in the presence of a dialkyl quat, as in the originally presented claims or it is not, as in claim 58

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 58 is withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 103

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 24 and 30-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 99/57259 in view of Merz, US 3,888,391 for the reasons of record in the previous office action.

Response to Arguments

5. Applicant's arguments filed August 28, 2006 have been fully considered but they are not persuasive. Applicant argues that the Merz reference, while disclosing a device for dispensing fabric softener in a first rinse, does not suggest using this device to dispense fabric softener in a manual rinse process. While this is correct, it is not persuasive because Merz was relied upon only for the teaching that fabric softener may be used in a first rinse process of *some* sort—that one or more rinses to remove residual detergent prior to adding fabric softener are not necessary.

The art is combinable because both references address the problem of softening fabric.

6. Based on previous interviews, the examiner understands that applicant is in the process of collecting evidence of commercial success. As a courtesy to applicant, this action is NOT FINAL.
7. Any inquiry concerning this communication or earlier communications from the
